work (CDN)

Amazon CloudFront is a fast content delivery network (CDN) service that se
data, videos, applications, and APIs to customers globally with low latency,
speeds, all within a developer-friendly environment. CloudFront is integrat
both physical locations that are directly connected to the AWS global infra
well as other AWS services. CloudFront works seamlessly with services inclu
Shield for DDoS mitigation, Amazon S3, Elastic Load Balancing or Amazon
for your applications, and Lambda@Edge to run custom code closer to cus
and to customize the user experience.

You can get started with the Content Delivery Network in minutes, using th
tools that you're already familiar with: APIs, AWS Management Console, AV
CloudFormation, CLIs, and SDKs. Amazon's CDN offers a simple, pay-as-you
model with no upfront fees or required long-term contracts, and support f
included in your existing AWS Support subscription.

Amazon CloudWatch

Complete visibility of your cloud resources and applications
